Enclosures:

No. 4681-C/42 dated 11th September 1942.

Sir,

Subject:- Government Industrial School, Bellary - Part II Scheme - 1943-44 - Proposals - Submitted.

I submit for the consideration of Government Part II schemes for 1943-44 in respect of the Government Industrial School, Bellary.

The Superintendent of the school has reported that the school has not been equipped with books, scientific apparatus, models etc., to the extent required and has been stressing their addition so as to make the coaching given to the boys in the school efficient and effective. He urges that their provision is very urgent and imperative, and I am, in the circumstances, recommending the same for the consideration of Government.

1. Purchase of books for the school library:

The library in the school is very poorly equipped and the staff are experiencing difficulty in imparting instruction to the students for want of uptodate reference books. For the same reason, the students are also not making a good use of the library. I therefore request that Government may be pleased to sanction a sum of Rs.600/- for the purchase of books to the library to be spread over a period of three years commencing from 1943--44.

2. Purchase of Mechanical models for the Drawing Class:

The school does not at present possess good models of machine parts and it has been found difficult to teach machine drawing. Generally, all engineering institutions are in possession of a variety of models; and though the school at Bellary is now more than a decade old, it has not been supplied with these models. I therefore request that a sum of Rs.300/- may be provided for the purchase of these models.

3. Purchase of Scientific Apparatus:

At present instructions in Applied Mechanics and Heat Engines are given by means of sketches drawn on black-boards only. The Instructors are unable to impress on the students the fundamental principles without practical demonstration. The outgoing students of this institution are thus at a definite disadvantage compared with those of the sister schoc at Madura, Calicut and Mangalore which have been provided with Applied Mechanics Apparatus and a few models of machine parts. I request that Government may be pleased to sanction the purchase of Applied Mechanics Apparatus at a cost of not exceeding Rs.800/-.

4. Appointment of an Attendar for the office:

Since the inception of the school in 1929 the volume of work in the school has increased considerably and it has

been found almost impossible to manage the entire volume of work with a single clerk sanctioned for the school. In the Government Industrial Schools at Madura and Calicut, there are two clerks for the office. Under the present financial conditions however, I do not recommend the appointment of an additional clerk, but instead I request that an Attendar at least on Rs.20/- per mensem may kindly be sanctioned to assist the clerk, as it is now possible to recruit a suitable man for this pay. The post may be created on a temporary basis for a period of two years in the first instance to see how this will relieve the work which is now being attended to by a single clerk.

To sum up, the financial implications involved in the foregoing proposals are as follows:

	1943-44 Expenditure. Recurring. Rs.	Non-recurring. Rs.
Purchase of books for the library to be spread over three years from 1943-44.		200
Purchase of Mechanical models		300
Do. Scientific Apparatus		800
Employment of an Attendar on Rs.20/ per mensem.	240	
Rs.	240	1,300

Ref: Printed D.I.C. No. 4681-C/42 dt. 11.9.42

To under Secretary:

The D.I.C. recommends the following for consideration in part II Scheme in respect of the Govt. Industrial School at Bellary:-

(i) Purchase of books for library – Rs. 200/-

(iii) Purchase of Mechanical models for trade classes Rs. 300/-

(iv) Purchase of Scientific apparatus Rs. 800/-

[redacted] Sanction for an additional attender @ Rs 20 p.m. Rs. 240/- p.

[redacted] (i) to (iv) the expenditure is non-recurring

11

~~Item (iv) is a recurring item. The pay of the attendant~~ ~~amounts to Rs 1300/-. Whereas Work in item (iv)~~
~~may be with Time Scale Rs 80-2/2-90 and is a~~
~~recurring one viz Rs 240/- p.a. Item One (1) b (iii)~~
~~have to be treated as Part II Scheme under~~
~~para 51 of the Budget manual. Item (iv) would~~
~~fall under exception (a) of para 50 of the~~
~~Manual & cannot be treated as a part of the~~
~~Scheme.~~ For orders whether the recommendation
of the DI&C in respect of this institution will
be accepted. The remarks of Fin. Min. &

Commerce — pages 1-2 C7 — being brought forward as a Part II Scheme for 1943-44, subject to the following remarks: —

The D.I.&C. has proposed the employment of an attender on Rs 20 p.m on a temporary basis for a period of 2 years in the first instance. The Devt Deptt suggest that the pay of the attender may be in the time-scale of Rs 19-$\frac{1}{2}$-33. This scale is that applicable to laboratory attendants (in the Industries Deptt and stores clerk in the Agriculture Deptt) and not to ordinary attenders whose scale is Rs 19-$\frac{1}{2}$-25-$\frac{1}{2}$-30 (Average pay Rs 25 p.m.). As the attender is to do clerical work, the scale of pay proposed may be agreed to and provision made for the grant of dearness allowance also (Rs 4½ p.m. in Bellary). The cost on account of the attender will then be Rs 378 or Rs 400 roundly, recurring. As the employment of an attender is necessitated by the normal increase of work in the school & as the cost is less than Rs 2,500 a year, the proposal by itself need not ordinarily be treated as a Part II Scheme provision made in Part I of the Budget. But all the proposals of the D.I.&C relating to the Industrial School, Bellary, may be taken together and treated as a Part II Scheme for next year as suggested by Devt.

The cost of the proposals will be as

1943-44		Ultimate cost	
Recurring	Non-recurring	Recurring	Non-recurring
Rs	Rs	Rs	Rs
300	1,300	400	1,700

	Total	378 or 400	1,700	263 or 300	1,300

NOTE BY THE ADMINISTRATIVE DEPARTMENT.

1. The Director of Industries and Commerce has submitted proposals for equipping the Government Industrial School, Bellary, with books, models, scientific apparatus, etc., to make the coaching given to the boys more efficient.

Books for the library.—The present library of the school is very poorly equipped. The staff and students are not able to make proper use of the library for want of up-to-date reference books. It is therefore proposed to purchase books for Rs. 600, the expenditure to be spread over a period of three years.

Mechanical models.—The school does not possess good models of machine parts and the instructors are handicapped in giving proper instructions in machine drawing. As other similar institutions possess a variety of models, this institution should also be equipped with these models. A provision of Rs. 300 is therefore now suggested for the purchase of models.

Scientific apparatus.—At present instructions in applied mechanics and heat engines are given by means of sketches drawn on blackboards. The instructors are therefore unable to explain the fundamental principles without practical demonstrations. As the other institutions are provided with such apparatus, it is desirable that this school should also be supplied with the necessary apparatus at a cost of Rs. 800.

2. The Director of Industries and Commerce has also proposed the appointment of an attender on a temporary basis as it has been found difficult to manage the entire volume of work in the school with the single clerk now employed.

3. In the circumstances explained by the Director of Industries and Commerce, this department support the proposals, and recommend the inclusion of necessary provision in the budget for 1943–44.

C. P. KARUNAKARA MENON—19–10–42.

NOTE BY THE FINANCE DEPARTMENT.

The proposals may be considered as a Part II Scheme for 1943–44.

With reference to the Fin. Dept. note at (T), the case may be circulated again for orders as to whether the scheme should be proceeded with or not. The proposals are explained in the note at K 7-8 above

5/11/42

6/11/42

I suggest that the proposals may be forwarded. They are intended to provide certain essential equipment which other Industrial Schools have but which this particular School has not had so far. The equipment are necessary to keep the Industrial School ~~teaching~~ in a State of efficiency by providing effective teaching aids
